CLEFT REGISTRY & AUDIT NETWORK

# Treble Cleft Quality Improvement Day

## CRANE Update

Sophie Butterworth on behalf of the CRANE team

Clinical Research Fellow

18 November 2022

# Overview

- Background
- Review of 2022 preliminary report
- Key quality improvement resources

# CRANE Database

- Established in 2000
- England, Wales and Northern Ireland
- National Cleft Register (S251) and Outcomes Database (Consent)
- 15 Centralised Cleft Services submit data to CRANE
- Most recent Annual Report – December 2021
- Overseen by Cleft Development Group (parents, commissioners, clinicians)

# CRANE key timepoints

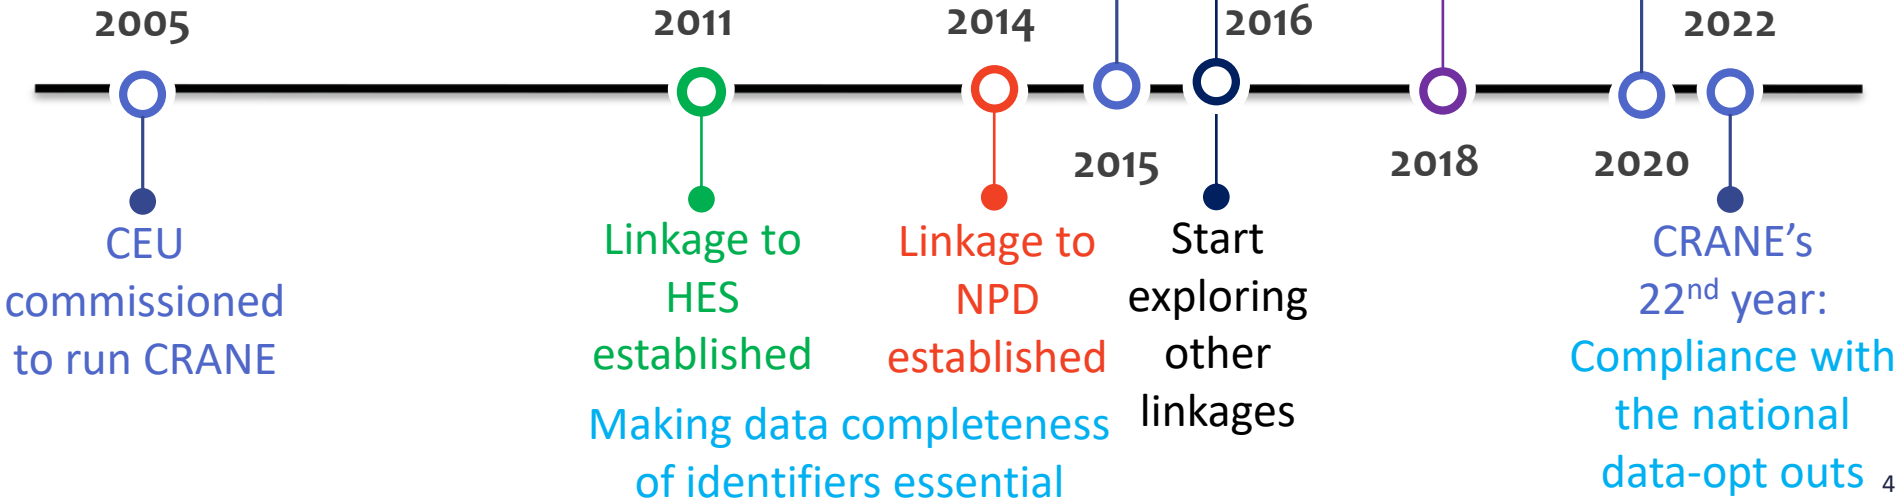

RCS System / IT support lost  
CEU re-dev of Database & Website

GDPR enacted:  
Emphasizing importance of good IG

Website Re-dev

CRANE's 22<sup>nd</sup> year:  
Compliance with the national data-opt outs

# 2022 CRANE Timeline

## Cleft Registry and Audit Network (CRANE) ANALYSIS TIMELINE 2022: Including dates for outlier process

The graphic below outlines the timeline that CRANE will work to in 2022.

Key data submission deadlines are also flagged – including those for the quarterly Specialised Services Quality Dashboards. For more information on the SSQD visit <https://www.crane-database.org.uk/resources/dashboard-indicators-submitted-by-crane>.

Patients recorded in CRANE up until the 31 December 2021 will be included in the 2022 preliminary report – used for preliminary identification of outliers – and included in the CRANE 2022 Annual Report.

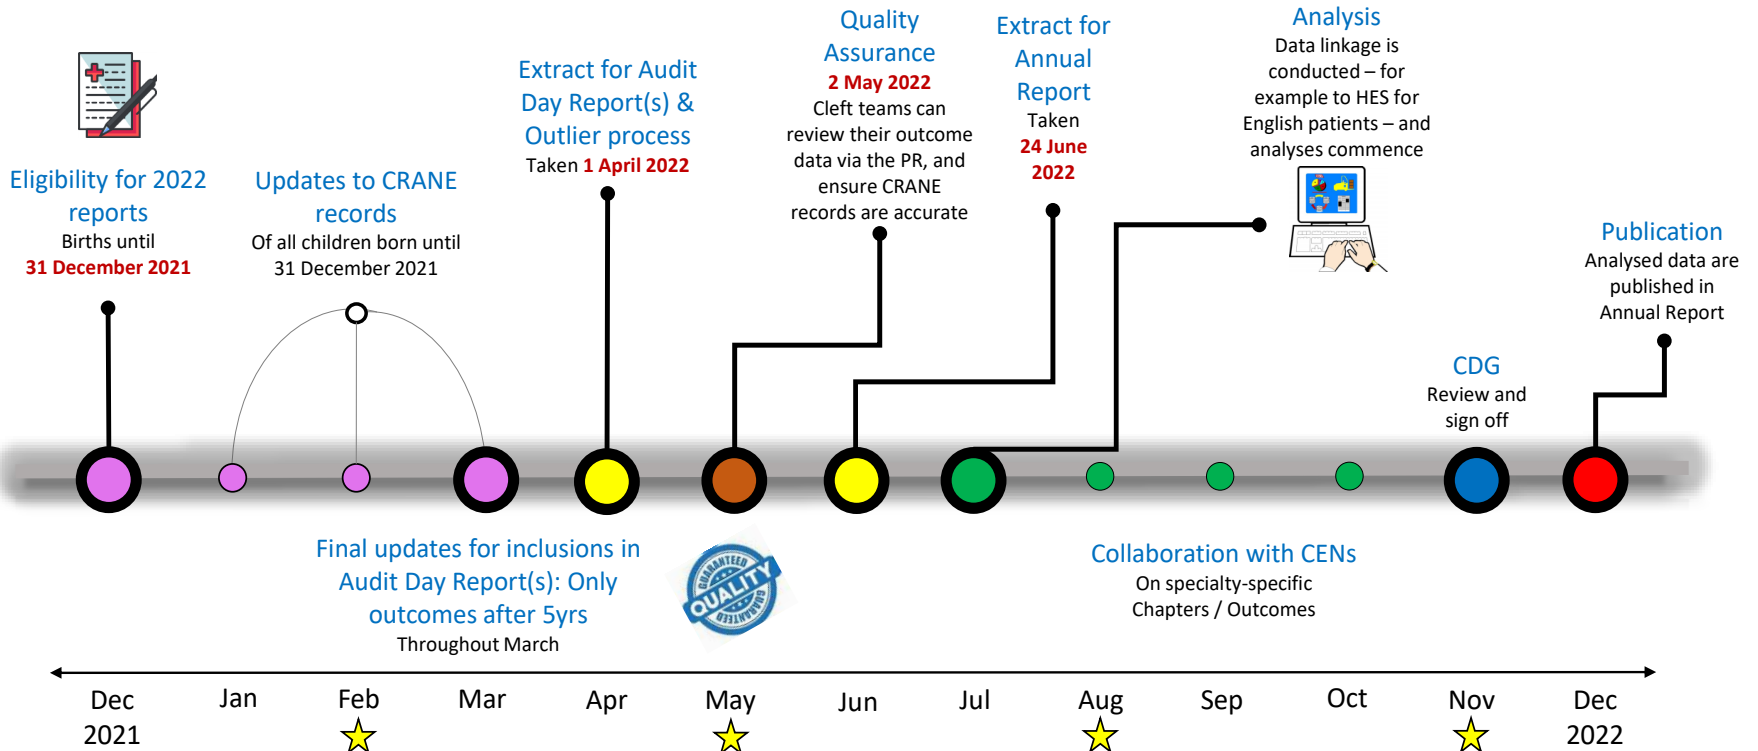

Once the data for the CRANE 2022 Annual Report has been analysed, the reports will be written. The final draft then will be agreed by key stakeholders, including the CDG, before publication in December 2022.

### Acronyms

PR: Preliminary Report  
AR: Annual Report  
CDG: Cleft Development Group  
CEN: Clinical Excellence Network  
QA: Quality Assurance

# Review of 2022 preliminary report

CRANE

CLEFT REGISTRY & AUDIT NETWORK

Registry chapters

Consent chapter

Outcome chapters

# Registry chapters

- Collected without consent
- Engagement with these chapters is particularly important to funders
- In general it is completed well by your services
- Few areas for potential improvement

# Registry chapters

CRANE

CLEFT REGISTRY & AUDIT NETWORK

- Most services good at recording sex of child
- Most services good at recording cleft type but South West below average
- Potential area for improvement

**Figure 3.3.** Percentage of children with cleft type specified in 2017-19, compared to national average for 2020 registrations, by cleft services.

Note: Children registered in the CRANE Database between 1<sup>st</sup> January 2017 and 31<sup>st</sup> December 2020, by the 30 June 2021.

# Registry chapters

CRANE

CLEFT REGISTRY & AUDIT NETWORK

- Combined data for 2017-19 very good
- 2020 data for Spires shows drop in diagnosis antenatally and at birth

**Figure 3.4.** Percentage of timely diagnoses, including those made antenatally and at birth, among all CRANE-registered children, born 2017-19, according to cleft service – by comparison with children born 2020.

**Note:** Children missing diagnosis time are excluded. Includes unspecified cleft types.

# Registry chapters

CRANE

CLEFT REGISTRY & AUDIT NETWORK

**Table 3.1.** Number (%) of CRANE-registered children born between 2017 and 2019 with a cleft palate, according to the timing of diagnosis and region / unit.

Cleft service	Time of diagnosis in relation to birth n (%)								All
	Antenatal	At birth	< 72 hours	≤1 week	≤1 month	≤6 months	>6 months		
Newcastle	1 1.7%	41 70.7%	2 3.4%	5 8.6%	3 5.2%	6 10.3%	0 0%	58	
Leeds	1 1.3%	53 69.7%	9 11.8%	7 9.2%	2 2.6%	4 5.3%	0 0%	76

Manchester	0 0.0%	48 68.6%	9 12.9%	6 8.6%	5 7.1%	1 1.4%	1 1.4%	70	
Trent	1 0.8%	81 64.8%	16 12.8%	10 8%	4 3.2%	9 7.2%	4 3.2%	125	
West Midlands	1 0.7%	123 89.1%	4 2.9%	4 2.9%	5 3.6%	1 0.7%	0 0%	138	
Cleft Net East	0 0.0%	59 72%	12 14.6%	6 7.3%	3 3.7%	2 2.4%	0 0%	82	
North Thames	9 6.0%	110 73.3%	9 6%	8 5.3%	4 2.7%	10 6.7%	0 0%	150	
Spires	2 2.1%	73 76.8%	9 9.5%	2 2.1%	4 4.2%	3 3.2%	2 2.1%	95	
South Wales	1 2.0%	43 84.3%	3 5.9%	0 0%	2 3.9%	2 3.9%	0 0%	51	
South West	6 8.1%	57 77%	5 6.8%	4 5.4%	2 2.7%	0 0%	0 0%	74	
Evelina London	6 4.0%	92 61.3%	24 16%	10 6.7%	11 7.3%	6 4%	1 0.7%	150	
Northern Ireland	0 0.0%	32 69.6%	5 10.9%	1 2.2%	4 8.7%	0 0%	4 8.7%	46	
<b>All</b>	<b>29 2.4%</b>	<b>860 72.5%</b>	<b>122 10.3%</b>	<b>65 5.5%</b>	<b>53 4.5%</b>	<b>45 3.8%</b>	<b>12 1%</b>	<b>1,186</b>	

**Note:** Recording of 'timing of diagnosis' within 72 hours commenced in May 2014 to align CRANE data collection with NIPE standards<sup>19</sup>.

# Registry chapters

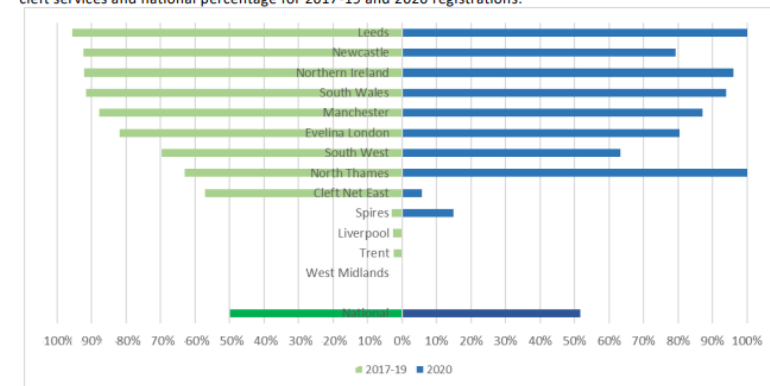

CRANE

CLEFT REGISTRY & AUDIT NETWORK

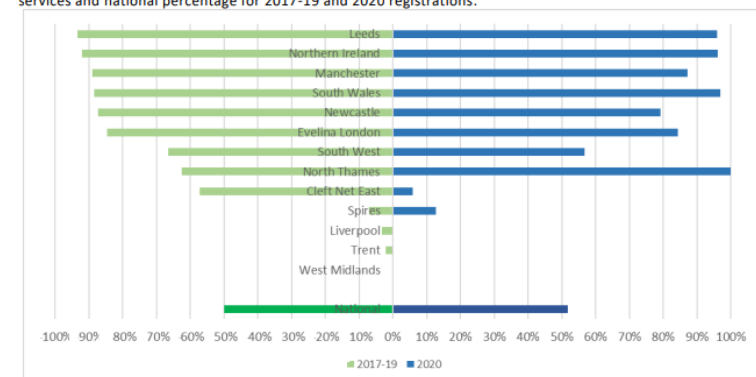

- West midlands and Spires poor at recording gestational age and birth weight

**Figure 3.7.** Percentage of CRANE-consented children with recorded gestational age in 2017-19 and 2020, by cleft services and national percentage for 2017-19 and 2020 registrations.

**Note:** All children registered in CRANE between 01 January 2017 and 31 December 2020, by the 30 June 2021. Children without consent for data collection at birth are excluded. West Midlands cleft service submitted no gestational age data between 2017 and 2020.

**Figure 3.8.** Percentage of CRANE-consented children with recorded birth weight in 2017-19 and 2020, by cleft services and national percentage for 2017-19 and 2020 registrations.

**Note:** All children registered in CRANE between 01 January 2017 and 31 December 2020, by the 30 June 2021. Children without consent for data collection at birth are excluded. West Midlands cleft service submitted no birth weight data between 2017 and 2020.

# Registry chapters

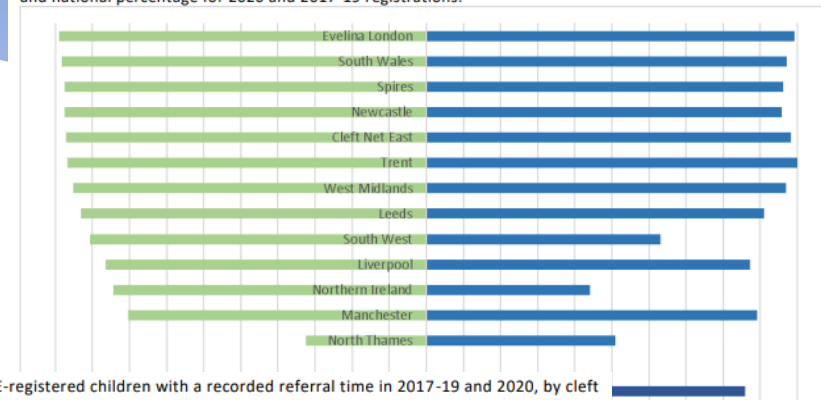

CRANE

CLEFT REGISTRY & AUDIT NETWORK

- All good at recording contact time – slight drop for South West in 2020 data
- Referral time not recorded quite as well overall – South West and West Midlands drop in 2020 data

**Figure 3.10.** Percentage of CRANE-registered children with a recorded contact time in 2020, by cleft services and national percentage for 2020 and 2017-19 registrations.

**Figure 3.9.** Percentage of CRANE-registered children with a recorded referral time in 2017-19 and 2020, by cleft services and national percentage for 2020 and 2017-19 registrations.

**Note:** All children registered in CRANE between 01 January 2017 and 31 December 2020, by the 30 June 2021. Excludes children who died within the first week after birth.

# Consent chapter

C  
R  
A  
N  
E

CLEFT REGISTRY & AUDIT NETWORK

- Important for the outlier policy
- Important for outcome reporting within each discipline

# Outlier policy

C  
R  
A  
N  
E

CLEFT REGISTRY & AUDIT NETWORK

- Developed in-line with HQIP guidance with CDG support
- 2012-2014 Birth cohort first year (last year pilot)
- Alert if between 2 and 3 SD from national mean
- Outlier if more than 3SD from national mean in one reporting cycle or if more than 2SD (alert) in 2 successive reports
- Integrity requires development of risk adjustment models

# Funnel plots

CRANE

CLEFT REGISTRY & AUDIT NETWORK

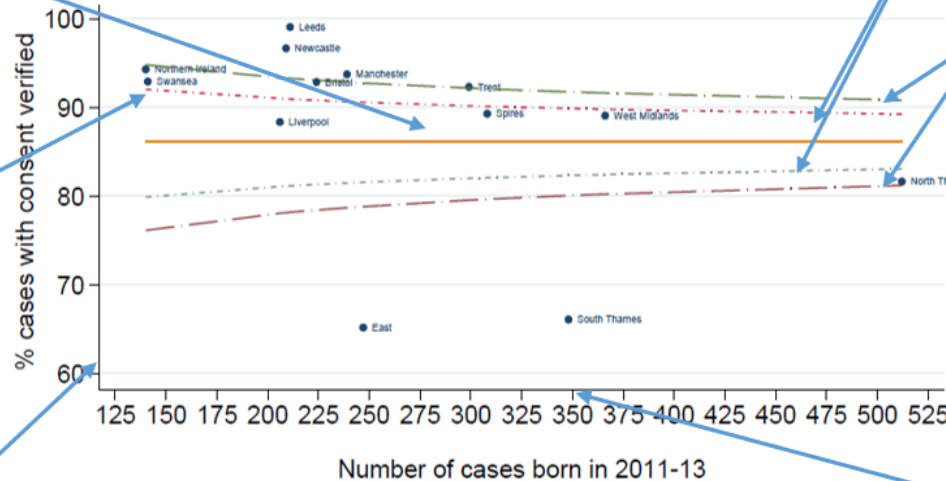

- The overall national percentage is shown as a horizontal line through the centre of the graph

- The graph shows two funnels that lie on either side of the benchmark and are called the control limits – similar to confidence intervals – that fall either side of the overall percentage

- Inner lines show two standard deviations or 95% control limits

- Outer lines represent three standard deviations or 99.8% control limits

- Each point on the funnel plot represents a region / unit

- The funnel shape is formed because the control limits get narrower as the total number of patients in an organisation increases

- Each funnel plot is for one outcome, with its values shown on the vertical/Y axis

- The size of the teams' cohort is shown on the horizontal or X axis

# Consent chapter

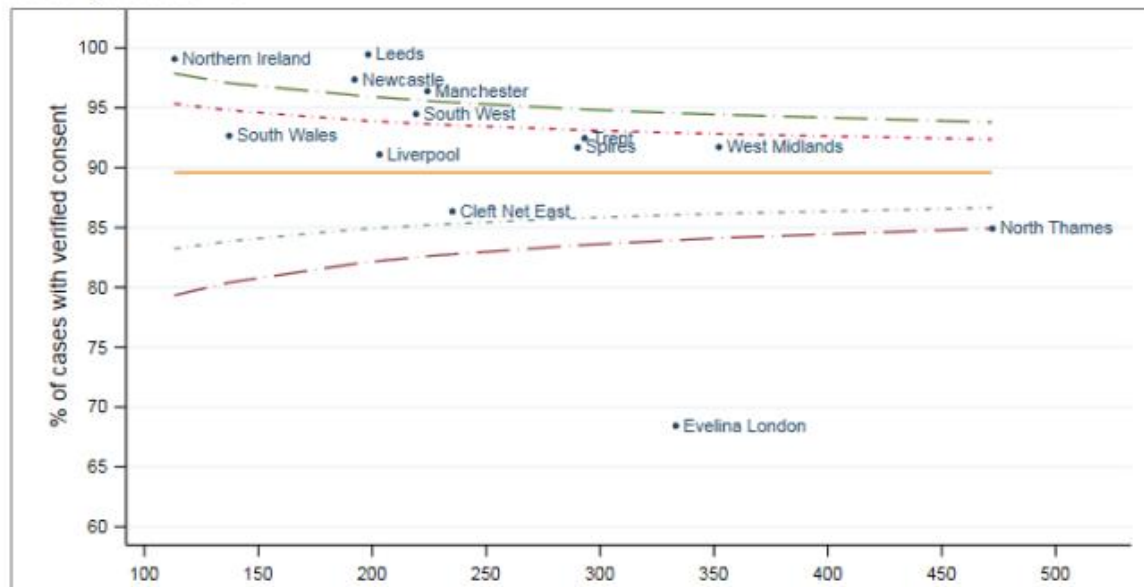

CRANE

CLEFT REGISTRY & AUDIT NETWORK

- All above average for verified consent

**Figure 3.11.** Funnel plot showing the percentage of CRANE-registered children (born 2011-2013) with verified consent, according to cleft service.

# Outcome chapters - Child growth

CRANE

CLEFT REGISTRY & AUDIT NETWORK

- Low completion rate nationally
- South West and West Midlands negative outliers
- South Wales positive outlier
- Spires above average
- All in range for healthy BMI funnels

**Figure 4.1** Funnel plot showing the percentage of CRANE-consented 5-year olds, born 2011-2013, with recorded child growth data submitted to CRANE, according to cleft service.

**Note:** Registered in CRANE by 30 June 2021. Funnel plot centred on the adjusted national percentage (45.6%) of children (born 2011-2013) with growth outcomes at the age of five years reported. See [Appendix 8](#) for the raw data (and exclusions) used to create this funnel plot.

# Outcome chapters – Dental

CRANE

CLEFT REGISTRY & AUDIT NETWORK

- South west negative outlier for data completeness
- Others all positive outliers
- West midlands and Spires just below 95% for dmft>0 (positive outcome)
- Spires negative outlier for dmft>5 (positive outcome)

**Figure 4.4.** Funnel plot showing the percentage of CRANE-consented 5-year olds, born 2011-2013, who had dmft data submitted to CRANE, according to cleft service.

**Note:** Registered in CRANE by 30 June 2021. Funnel plot centred on the adjusted national percentage (57.1%) of children (born 2011-2013) with dmft data reported. See [Appendix 9](#) for the raw data (and exclusions) used to create this funnel plot.

# Outcome chapters – Facial growth

- South west just below 95% for data completeness
- Less than 20% nationally had data for 2014 (>60% for 2011-13)
- Good facial growth – all within funnel

**Figure 4.8.** Funnel plot showing the percentage of CRANE-consented 5-year olds, born 2011-2013, who had facial growth data submitted to CRANE, according to cleft service.

**Note:** Registered in CRANE by 30 June 2021. Funnel plot centred on the adjusted national percentage (63.7%) of children (born 2011-2013) with facial growth outcomes at the age of five years reported. See **Appendix 10** for the raw data (and exclusions) used to create this funnel plot.

# Outcome chapters – Speech

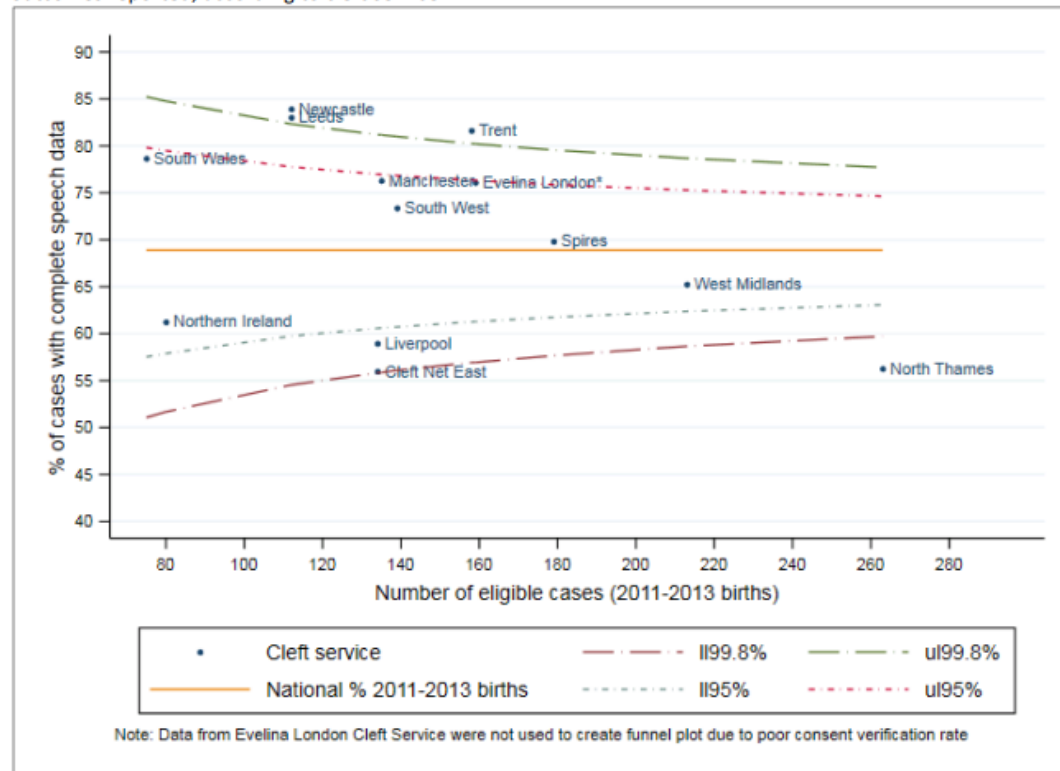

CRANE

CLEFT REGISTRY & AUDIT NETWORK

- All within funnel for data completeness
- Speech within normal range (SS1)– all within funnel
- SS2a – all within funnel
- SS3 – all within funnel

**Figure 4.11.** Funnel plot showing the percentage of CRANE-consented 5-year olds, born 2011-2013, with speech outcomes reported, according to cleft service.

**Note:** Registered in CRANE by 30 June 2021. Funnel plot centred on the adjusted national percentage (68.9%) of children (born 2011-2013) with speech outcomes reported. See [Appendix 11](#) for the raw data (and exclusions) used to create this funnel plot.

# Outcome chapters – Psychology

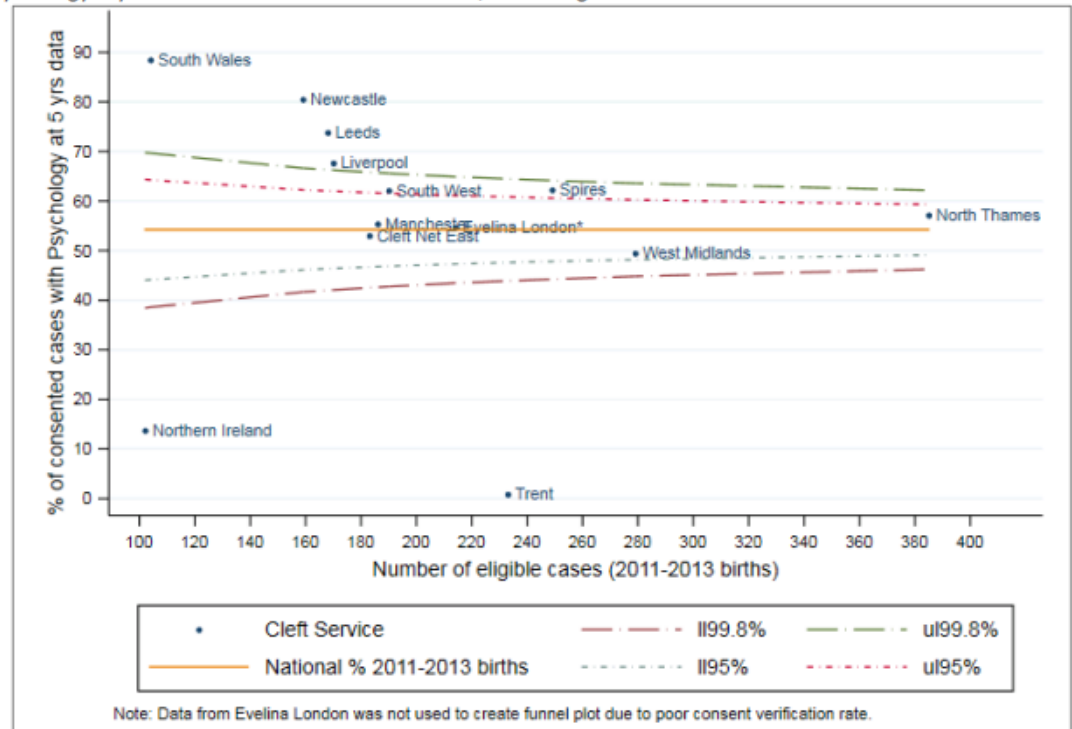

CRANE

CLEFT REGISTRY & AUDIT NETWORK

- South Wales positive outlier for data completeness
- All rest within funnel (Sp/SW upper end)
- Drop for West Midlands 2014 data
- Spires/West Midlands negative outliers for screen before age 6
- West Midlands close to being outlier for TIM score of 1a+ and negative outlier for high/very high SDQ scores

**Figure 4.16.** Funnel plot showing the percentage of CRANE-consented 5-year olds, born 2011-2013, who had all psychology 5-year-audit data submitted to CRANE, according to cleft service.

**Note:** Registered in CRANE by 30 June 2021. Funnel plot centred on the adjusted national percentage (54.2%) of children (born 2011-2013) with psychology outcomes reported. See Appendix 12 for the raw data (and exclusions) used to create this funnel plot.
