

Child growth and speech outcome data completeness South Wales

Michaela Rowe

Lead Specialist cleft Nurse

CONSISTENCY AND UNDERSTANDING

- Co-Ordination of 5yr clinic- children booked at 5yrs 6 months so can be re booked before 6 years
- Robust Was Not Brought Policy
- Staff aware of who's attending- clinic list circulated well before clinic
- Held in same location- Held in 1 site and records stored at this site
- Same people input Data
- Same person takes the growth measurement
- Pro forma developed so all clinicians attending clinic complete during the clinic > goes to secretary > entered on CRANE
- Speech data taken at clinic > consensus listening > complete pro forma > entered on CRANE > person entering data present at consensus listenisng
