CLP09 Indicator: Percentage of five year old children (from 5 years of age and under 6 years of age), born in the two designated years, with complete UCLP who have good maxillary growth as determined by the 5 Year Growth Index.

Cohort summary	Data source	CRANE Database.
	Countries	England and Wales.
	Coverage period	All children registered in the CRANE Database with a date of birth within the two reporting years (refreshed every calendar year) ¹ .
	Exclusions	Scotland and Northern Ireland registrations.
	Numerator	Number of consented ² children with a complete UCLP, born in the two designated years, who at the age of 5 years and before they are 6 years of age have 5 Year Growth Index scores of 1 or 2.
	Inclusions	(a) All consented children who are alive at five years of age. (b) Children with a complete UCLP. (c) All children without submucous cleft palates. (d) Children with 5 Year Growth Index scores of 1 or 2 recorded in CRANE before the age of six years.
	CRANE data items (Field name in data dictionary) ³	(a) Consent status (consent) with a response value of ' 2=Yes '. (b) Date of birth (dob) – to specify the time period. (c) Date of death (dod) – to ensure all children included were alive at five years of age. (d) Administrative Unit Name (unit_id) – to report appropriately (and exclude Scotland and Northern Ireland registrations). (e) LAHSAL code (I_code) with response values of ' LAHS.. ' or ' ..HSAL ' – indicating a complete UCLP. (f) Submucous cleft palate (submucous) with response values of ' 1=No ' or missing a response. (g) Five year old index (externally validated, where this is unavailable internal scores are included; five_year_external_o5 and five_year_internal_o5) with response values of ' 1 ' or ' 2 '. (h) Five year old index, assessed from 5 years and before the age of 6 years, recorded in CRANE (date study model taken, where this is unavailable the date photos taken are included; study_model_o5 and photos_taken_o5) – to check age of assessment. Where this is missing, we assume the assessment took place at the correct age.
	Denominator	Total number of (5 year old) consented ² children with complete UCLP, born in the two designated years, recorded in CRANE.
	Inclusions	(a) All consented children who are alive at five years of age. (b) Children with a complete UCLP. (c) All children without submucous cleft palates.
	CRANE data items (Field name in data dictionary) ²	(a) Consent status (consent) with a response value of ' 2=Yes '. (b) Date of birth (dob) – to specify the time period. (c) Date of death (dod) – to ensure all children included were alive at five years of age. (d) Administrative Unit Name (unit_id) – to report appropriately (and exclude Scotland and Northern Ireland registrations).

¹ For example, this is 2012 and 2013 births for the 2020/21 SSQ Dashboards.

² Essential for CRANE to have the legal basis to collect and report outcomes.

³ As per CRANE Data Dictionary <https://www.crane-database.org.uk/resources/crane-data-dictionary/>

		<p>(e) LAHSAL code (I_code) with response values of 'LAHS..' or '..HSAL' – indicating a complete UCLP.</p> <p>(f) Submucous cleft palate (submucous) with response values of '1=No' or missing a response.</p>
